vSOCBox™

vSOCBox CASB

Cloud Access Security Broker

A Single Security Solution for Multiple cloud applications and integration

vSOCBox CASB secures most of cloud applications with multiple key partner integrations along with insightful results.

Office 365   aws   Azure   G Suite

Dropbox   ORACLE   box   salesforce.org

vSOCBox CASB is a security solution with its distinctive capability to secure enterprise cloud infrastructure and applications.

360 degree data-centric approach	Cohesive Cloud security approach	Immediate Threat Response

Visibility. Control. Protection

THE **BUSINESS CHALLENGES**

Lack of Insights
Limited data about how many or which cloud apps, IoT are being used and how

Data Breaches
Data breaches are increasing and current security solutions failed to protect such breaches and meet compliance requirement

Lack of Control
Lack of integrated Security & skilled Security Resources increases challenge to detect motivated, advanced attackers.

Multiple Identities
Managing Mutli Identities across Cloud and On Premise Apps

Lack of Tools
Security Solution alarms are delivered in non-integrated silos, increasing costs & decreasing Security teams' effectiveness

CASB **SOLUTION**

Centrally managed identities and access. Integrates with existing controls(SIEM etc)

Monitor and protect access to cloud, IoT & internal applications. Discovery of shadow IT.

Analyze privilege activities and protect data leakage.

Work with any user, network, any device. Ease of deployment (No time)

Key **Features**

SECURITY INTELLIGENCE PLATFORM

- Access Broker
- Credential Mapping
- Device Profiling
- MFA

- Policy Enforcement
- Entitlement Management
- Data Protection
- Threat Analytics

vSOCBox **CASB**

Experience the easiest deployment Unified Security Control with CASB

Office 365   aws   Azure

Identify. Analyze. Secure. Control.
