

Qualys Endpoint Security

vSOCBox™

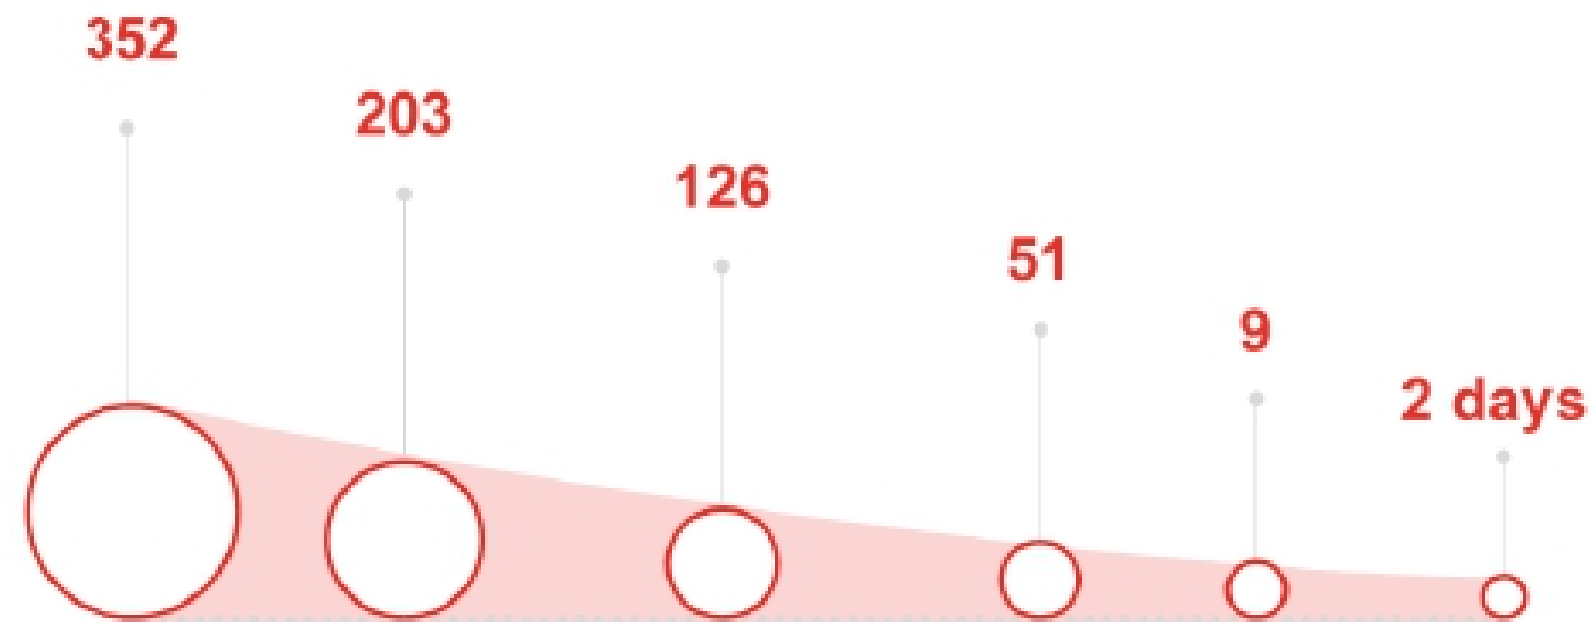

2023 QUALYS TRURISK RESEARCH REPORT

Today's threat actors are weaponizing more vulnerabilities, faster

of Days after NVD Publication that Exploit Weaponized Occurred

2018: Exploit weaponization took 352 days

2022: Time to weaponize exploit down to 9 days

Mass exploitation of Log4Shell occurred in 48 hours

Malware	CVE & Patch Count	Misconfigs Count
Conti	24	61
DarkSide	4	54
Netwalker	8	3
Petya	10	6
REvil	24	27

Security Silos Limit on Defender's Efficiency

A New Approach is Needed

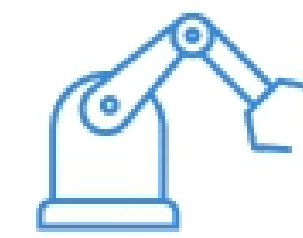

Singe Pane of Glass

Work off a **single source of truth** for assets, vulnerabilities, remediation and malware incidents. This helps to **use resources more efficiently, lower costs, and elevate security.**

Prevent more threats at the earliest stages

Immediately address root causes of intrusions bridging the gap between threats and vulnerabilities.

Smart Automation

Ability to automatically respond based on risk profile.

Close the Loop with Qualys TruRisk Platform

Deep context to help prioritize, speed investigations

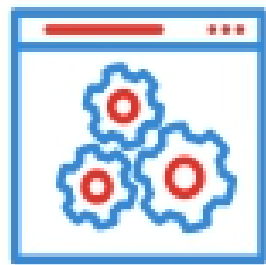

Prioritized patching reduces security alerts

Powerful next-gen AV with multi-layered prevention

Threat and vulnerability insights to help optimize defenses

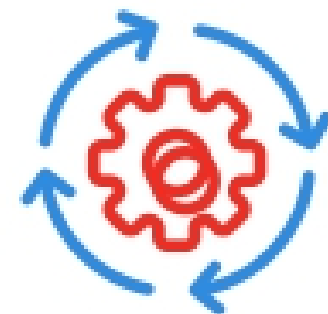

Break through Security Barriers with Qualys Endpoint Security

Reduce risk of a breach

Prevent more threats at the earliest stages and empowering responders to act fast

Close the gap between threat and vulnerabilities with consolidated **VMDR, Endpoint Security & Patch Management**

Eliminate alert fatigue

Reduce alert volume and unlocking faster, more powerful investigations.

Improve analyst efficiency
20%-50%

Save Time and Resources

Employ a simple and inexpensive platform that smashes organizational boundaries in minutes

Avg **40+%** cost savings

Qualys Endpoint Security with VMDR TruRisk:

Product Capabilities

Multi-layered Protection

Incident Response

Threat and Vulnerability Intelligence

Native Integration with Qualys TruRisk Platform

Easy to deploy and Manage

Qualys Endpoint Security with VMDR TruRisk:

Product Capabilities

Incident Response

Threat and Vulnerability Intelligence

Native Integration with Qualys TruRisk Platform

Easy to deploy and Manage

Prevention (aka EPP):

Block known and unknown attacks such as ransomware and phishing with multiple layers of technologies.

- ✓ Mature and well-trained machine learning models to block malicious binaries.
- ✓ Actively monitors all user and endpoint activity to protect against malicious behavior in real-time.
- ✓ Anti-exploit to block attacks that leverage memory and vulnerable applications such as browsers, document readers, media files, and runtime (i.e., Flash, Java).
- ✓ Anti-phishing technology that blocks access to phishing and malware hosting sites.
- ✓ Network attack defense that analyzes network behavior in real-time to accurately uncover malware activities like lateral movements and brute force attempts.

Easy to deploy and Manage

EDR

Real-time monitoring of endpoint data for suspicious activity detection & threat hunting, and automatic response workflows.

- ✔ **Incident Management** - Automatic Incident Prioritization, Visualization and Root Cause Analysis allowing security administrators to focus on the most important activities
- ✔ **Threat Hunting** - Allows security administrators to proactively inspect events in your network to locate suspicious activities
- ✔ **Out of the box automation options** to define your risk thresholds and response allowing to move from manual investigation to automatic remediation
- ✔ **Threat forensics** and **Remote shell** for advanced and thorough endpoint investigations

Qualys Endpoint Security with VMDR TruRisk:

Product Capabilities

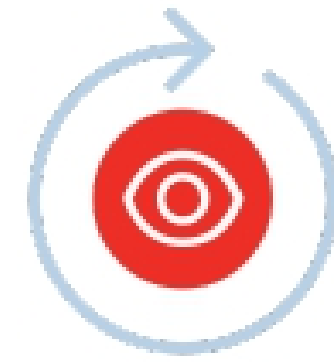

Multi-layered Protection

Incident Response

Threat and Vulnerability Intelligence

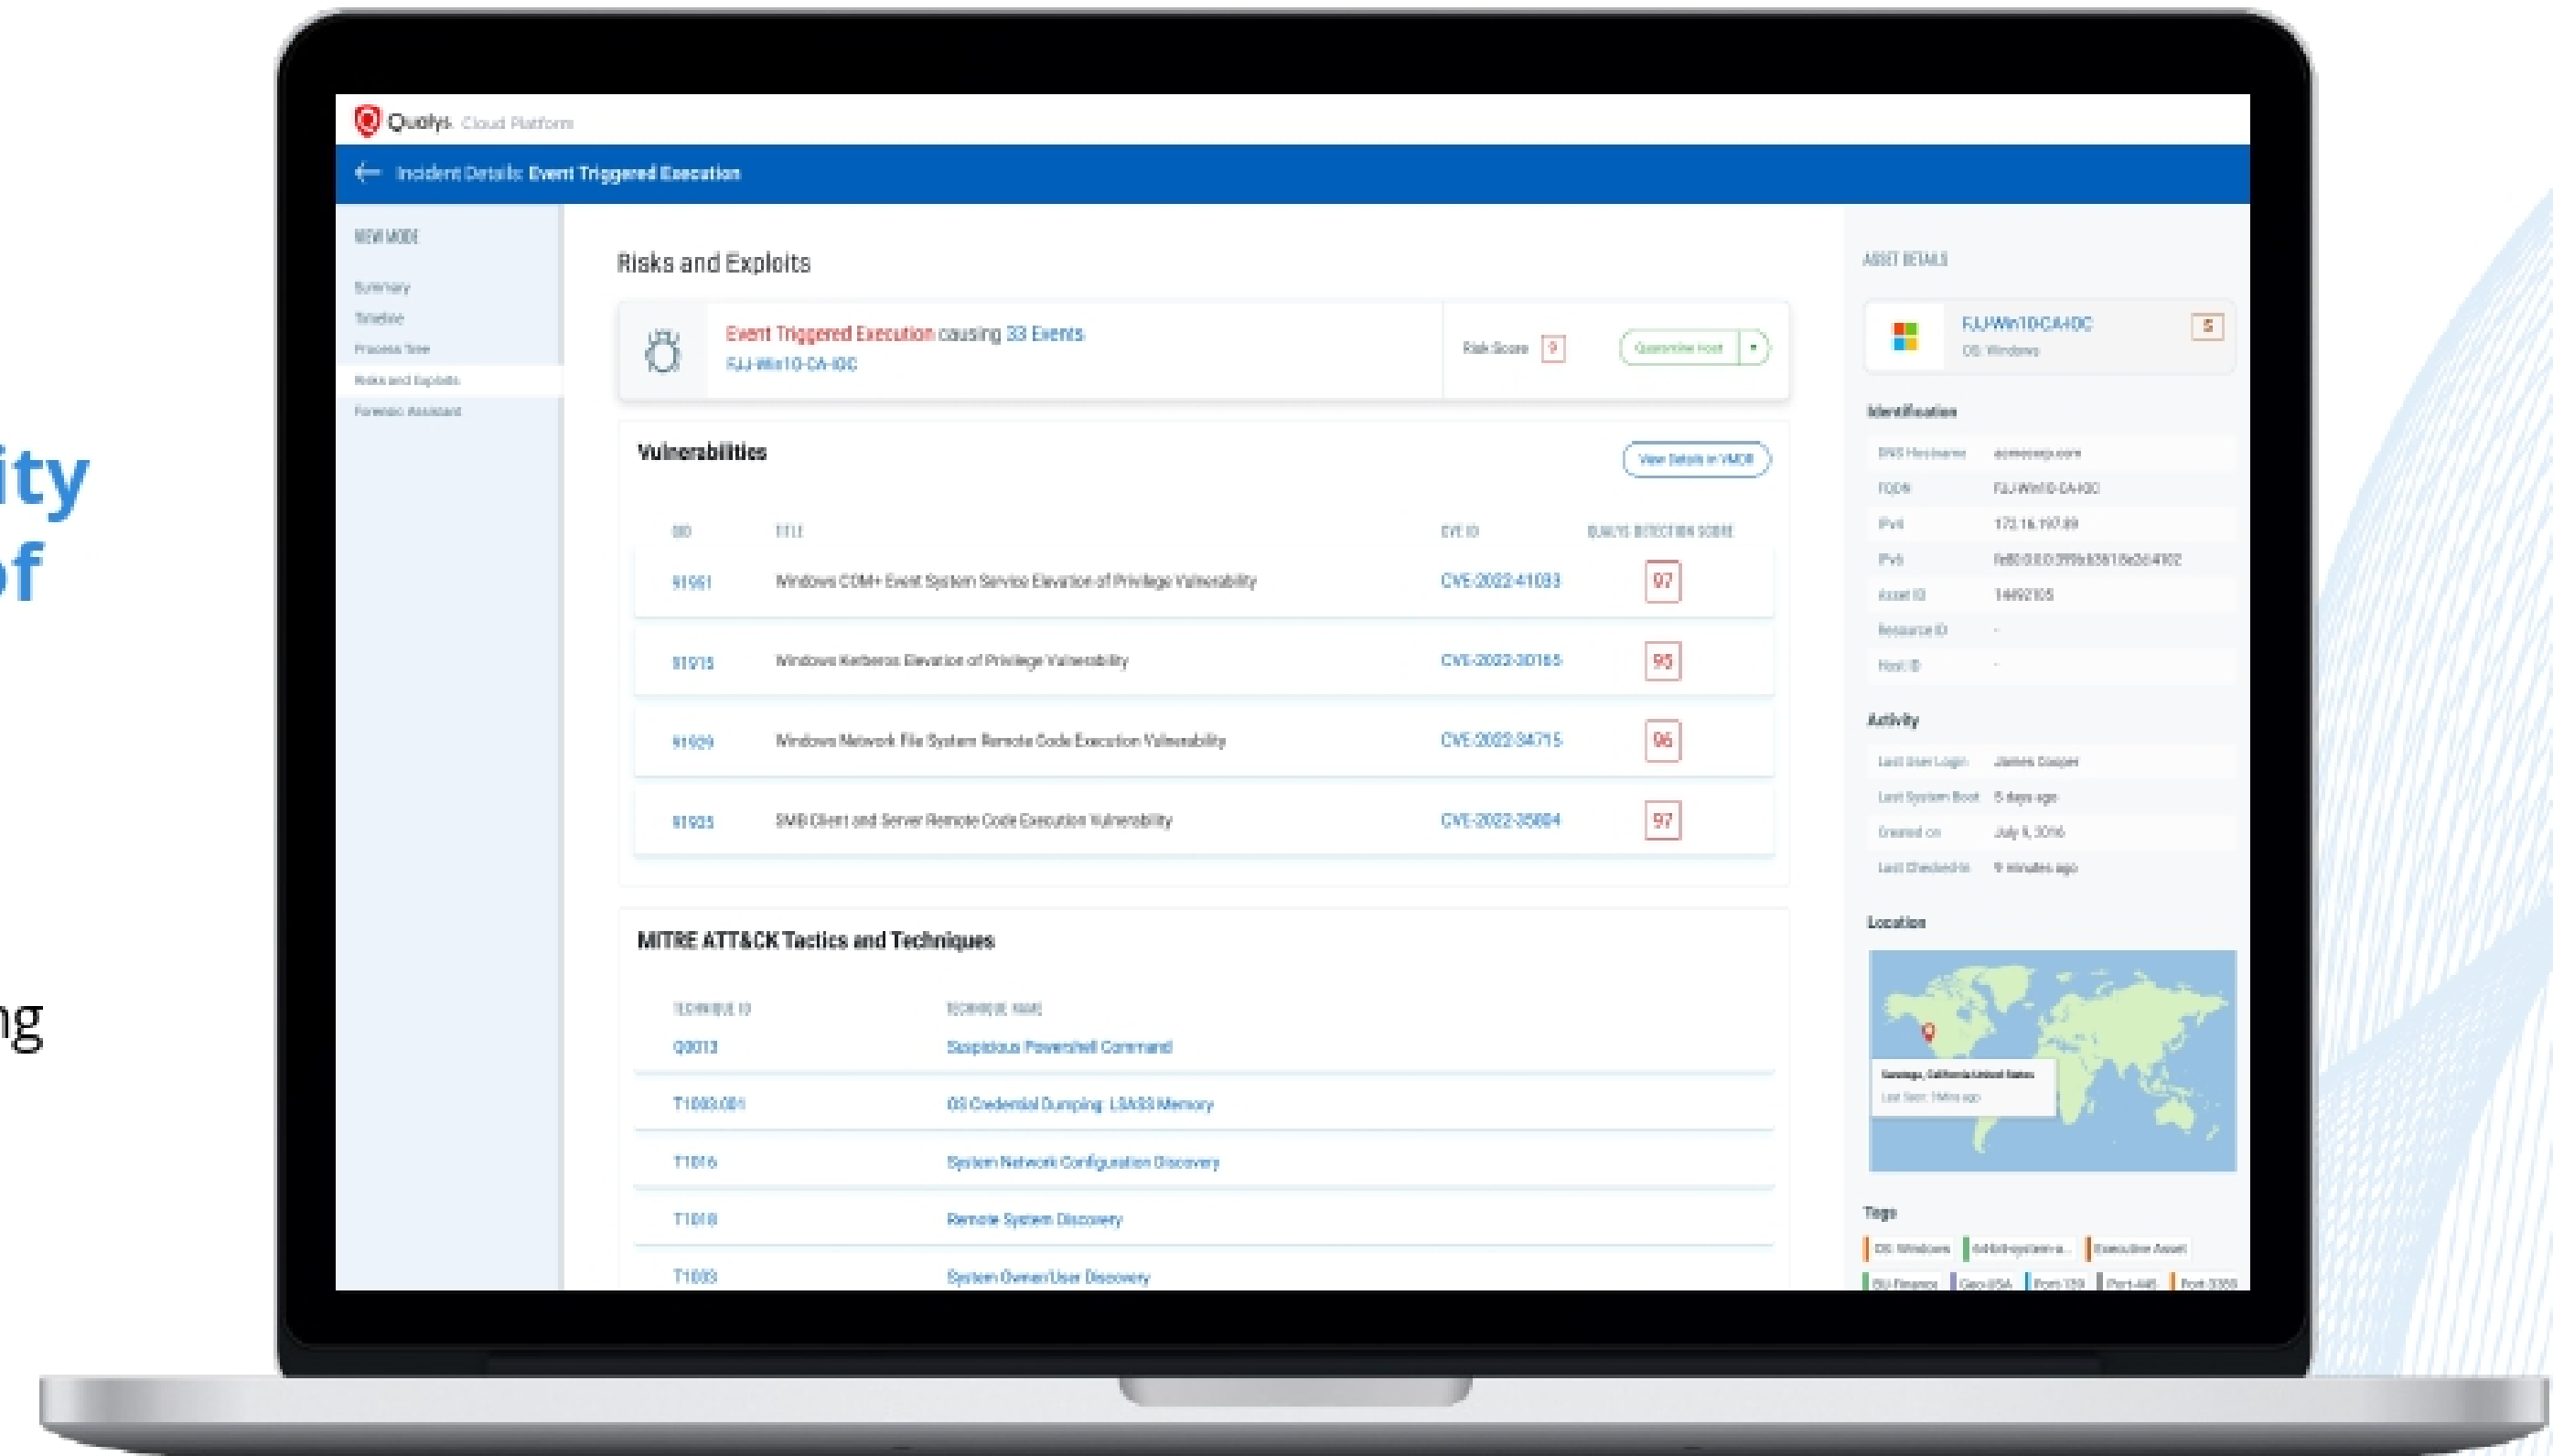

Native Integration with Qualys TruRisk Platform

Easy to deploy and Manage

Continuous visibility and remediation of actively exploited vulnerabilities.

Bridge the gap between threats and vulnerabilities by automatically correlating malware incidents, CVE's and Patches to prevent future attacks.

Qualys Endpoint Security with VMADR TruRisk:

Product Capabilities

Multi-layered Protection

Incident Response

Threat and Vulnerability Intelligence

Native Integration with Qualys TruRisk Platform

Easy to deploy and Manage

End-to-end Security through integrated “mesh” of use cases, intelligence & automation

- ✓ Unprotected Assets: Allows security administrators to discover and protect assets that do not have any Agent/Endpoint Security software
- ✓ Incident Response: Asset criticality & business context, exploitable vulnerabilities and misconfiguration information, missing patches, and additional context such as EOL software, application inventory speeds up incident investigation and response
- ✓ Risk Mitigation: Risk scoring, alert prioritization and the ability to configure automatic response

Qualys Endpoint Security with VMDR TruRisk:

Product Capabilities

Multi-layered Protection

Incident Response

Threat and Vulnerability Intelligence

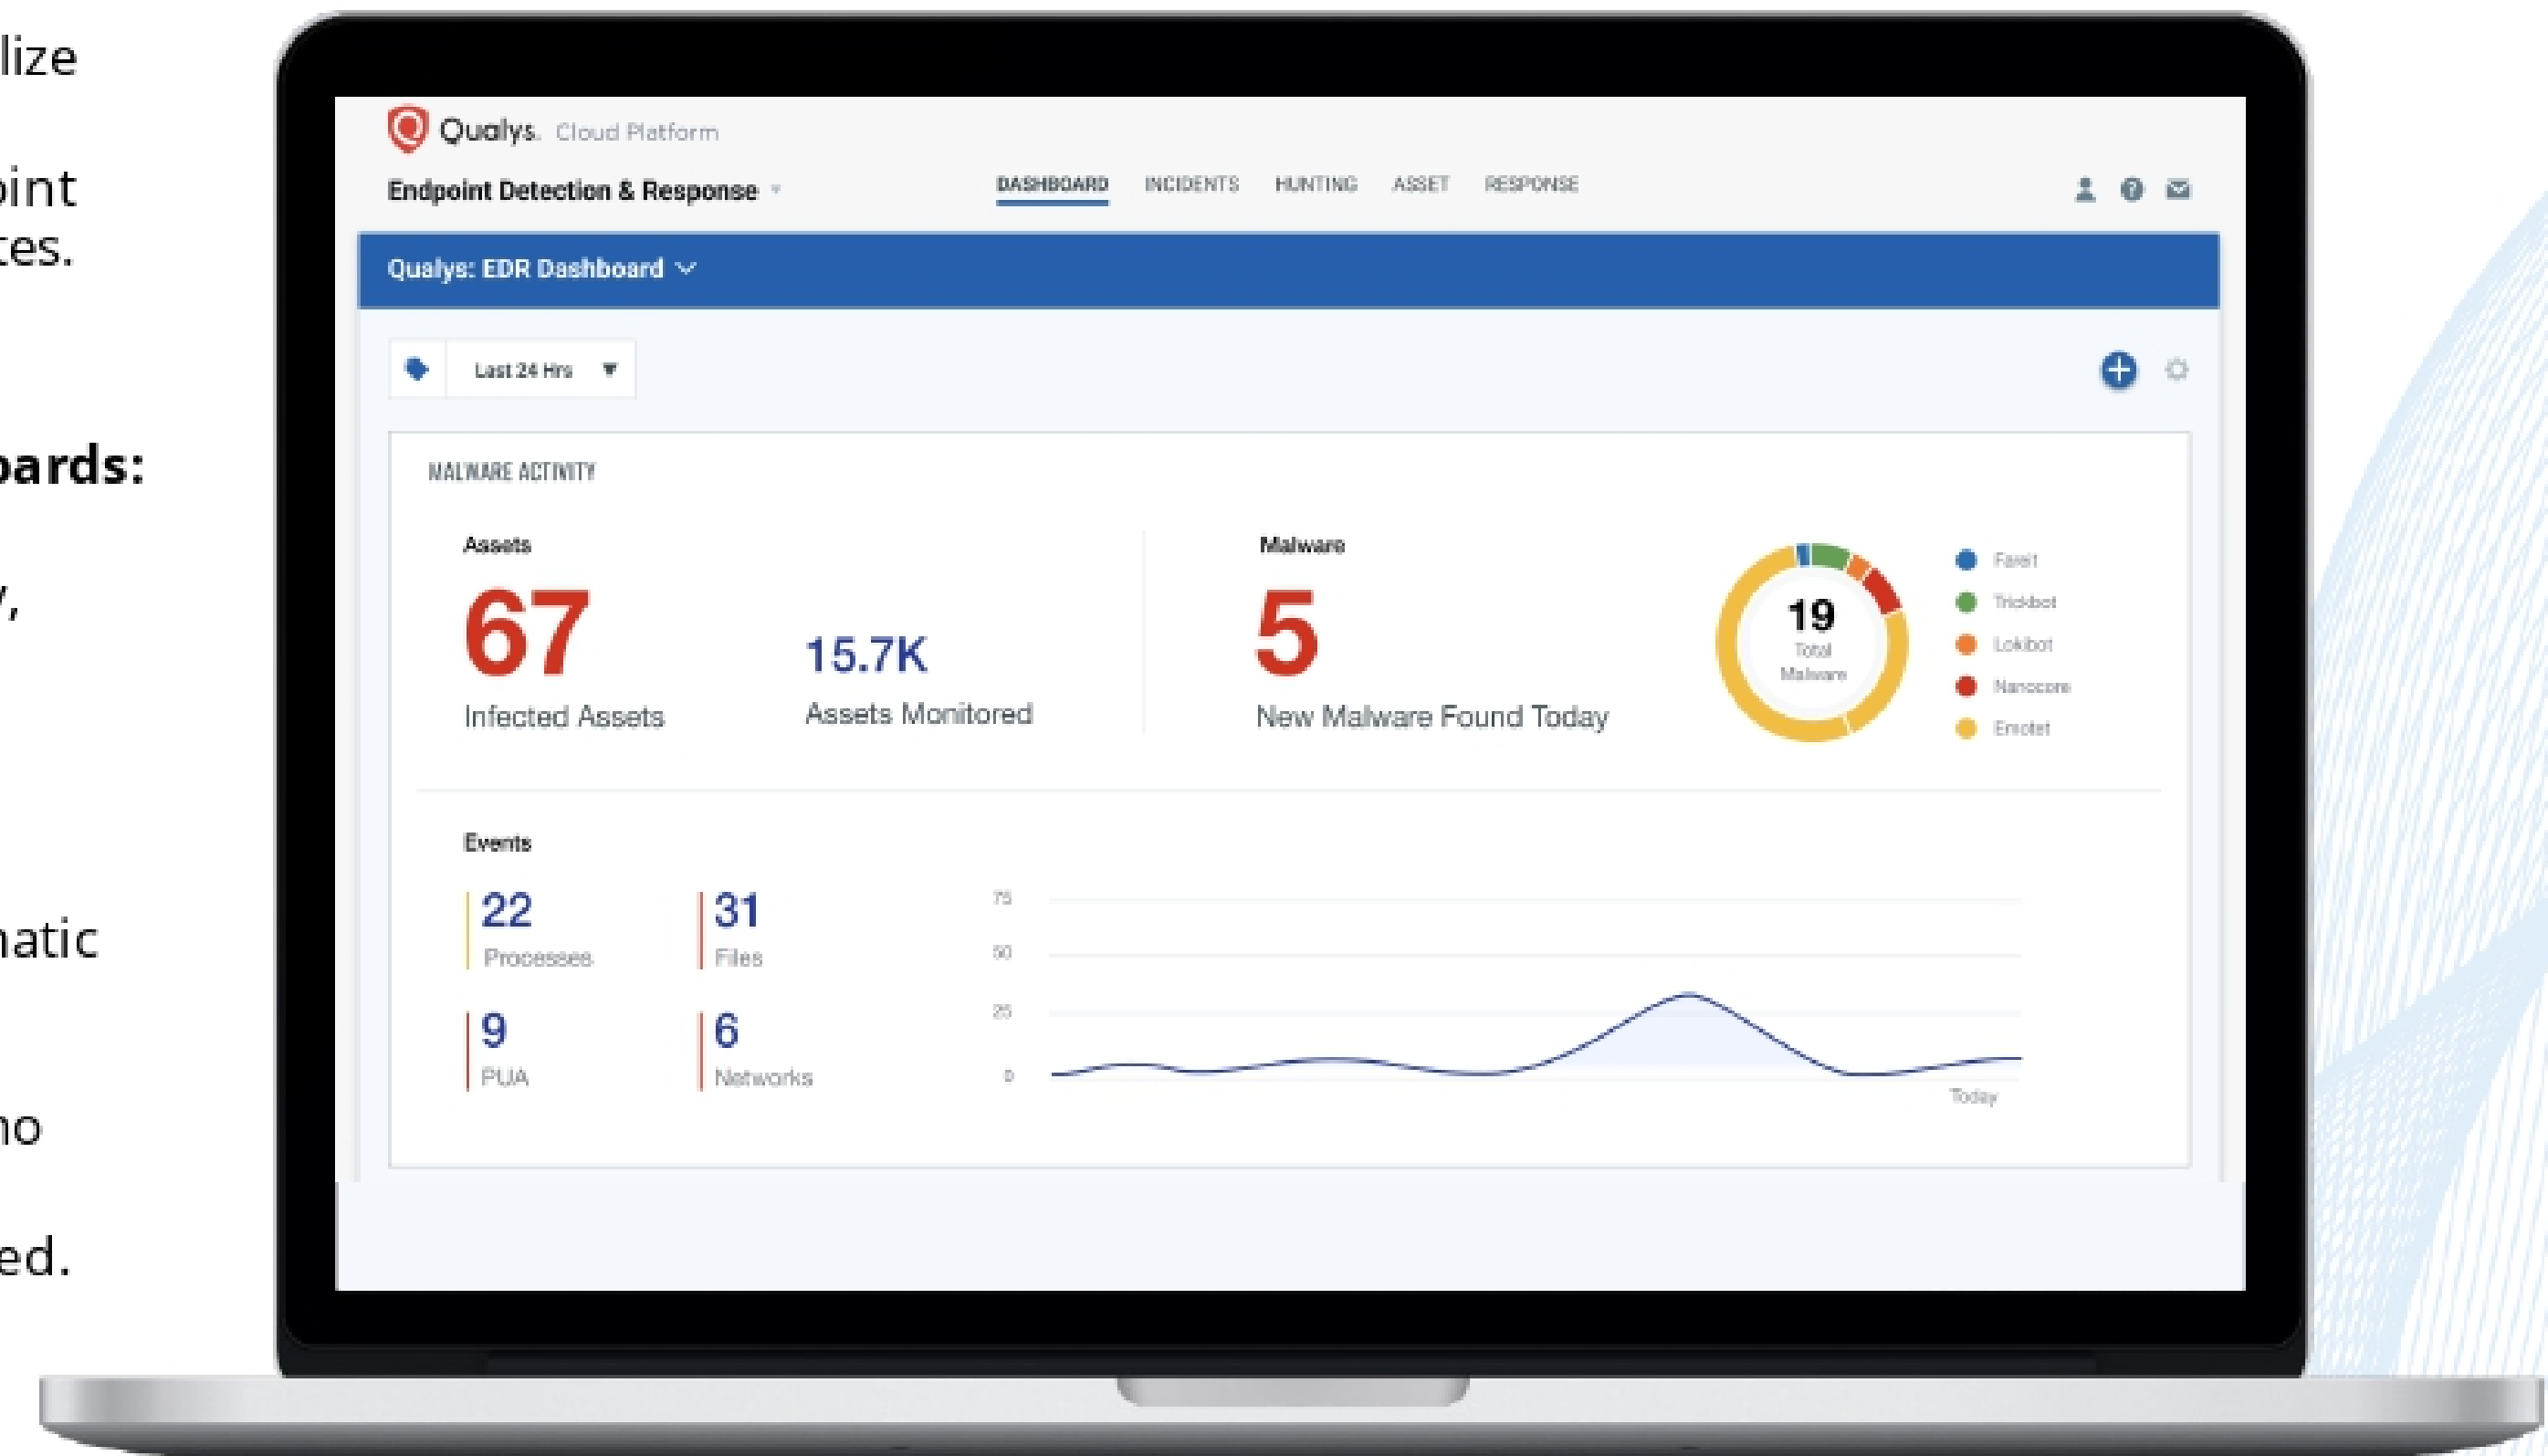

Native Integration with Qualys TruRisk Platform

Easy to deploy and Manage

✓ **Ease of Activation:** Utilize the same Qualys Cloud Agent to activate endpoint protection within minutes.

✓ **Reporting and Dashboards:** Flexible reporting and dashboards for security, compliance and risk management.

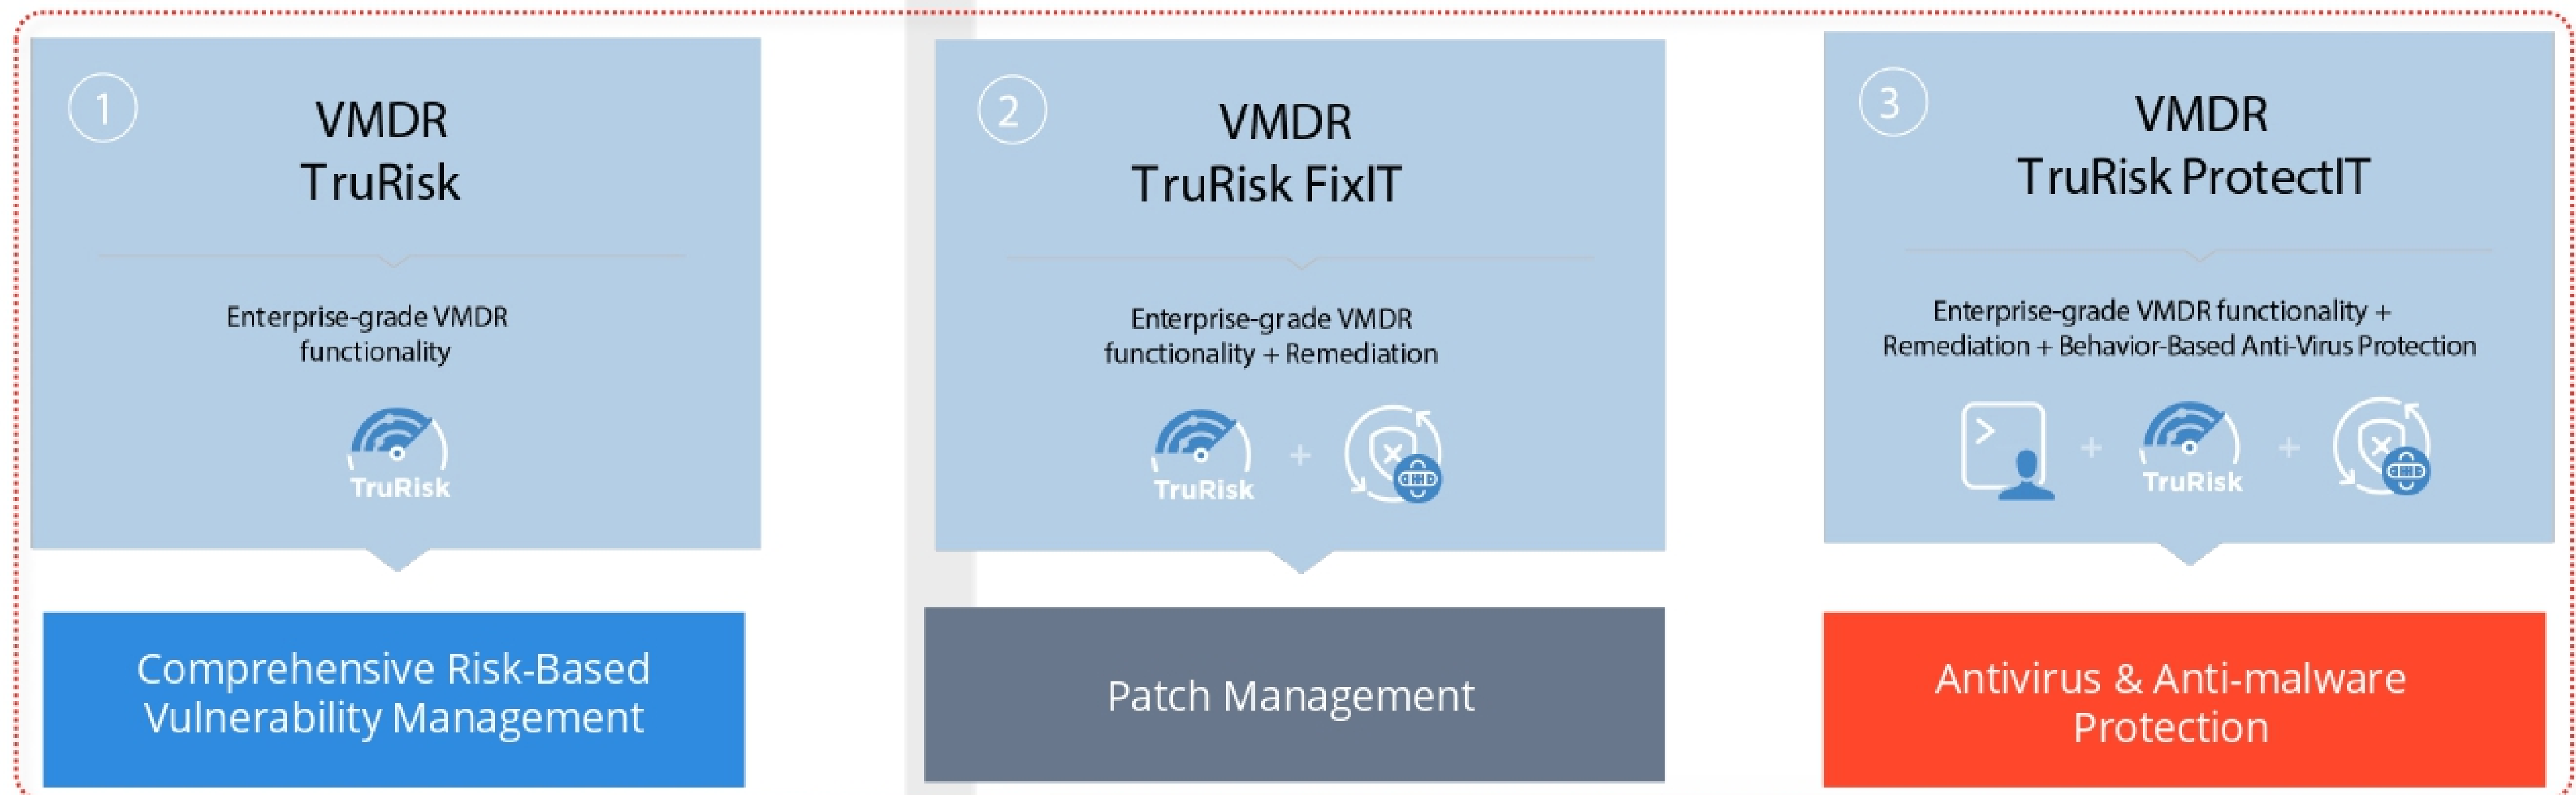

✓ **Easy Migration:** Automatic replacement of your existing solution with Qualys Anti-Virus with no gaps in coverage or rip/replace work required.

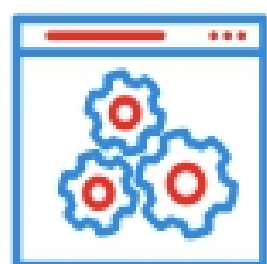

Cybersecurity Packages for SME/SMBs

Simple, easy-to-deploy cybersecurity packages to **manage**, **remediate** and **protect** made for small businesses

Qualys Endpoint Security with VMDR TruRisk

Prevent future attacks

Closed loop response to immediately address root causes of intrusions.

Close the gap between threat and vulnerabilities with consolidated **VMDR, Endpoint Security & Patch Management**

Stop known and unknown threats

Autotuned Real-time protection from modern threats including ransomware and phishing attacks.

20+ Layers of Different protection techniques

Enhanced Visibility & Incident Response

Suspicious activity detection, threat hunting, and automatic remediation

2,000+ behavior detection rules to identify advanced attacks

Save Time and Resources

Reduce your security & compliance costs with One agent, One platform instead of using a point EPP EDR solution

Activate Endpoint Security **within a few minutes**

Customer Success Story

Customer *A-ha!* Moments: Protection Use-case

// We were using a legacy endpoint security solution. The malware incidents were increasing with remote work post-covid. We were looking for a new solution. Since Qualys agent was already deployed for vulnerability management, we decided to try Qualys Endpoint Security. After successful POC, we were able to roll out Qualys Endpoint Security on 10,000 endpoints in 3 days. Malware incidents have significantly decreased since we migrated to Qualys Endpoint Security.

Customer *A-ha!* Moments: Consolidation Use-case

“ We had 3 different standalone tools- Tenable Scanner for Vulnerability Management, WSUS for Patch Management and Symantec for Endpoint Protection. The mandate from management was to consolidate security tools. We tried many different solutions, but Qualys Platform stood out due to feature-rich capabilities, a single agent and a single platform approach”

Midsized Media Company

Customer *A-ha!* Moments: Insurance Use-case

“ Cyber Insurance required us to have an incident response tool. We were already using Qualys Cloud Agent for vulnerability management. We decided to enable Qualys Endpoint Security with incident response capabilities and able to fulfil cyber insurance requirements instantly .
