

vSOCBox™

Why M-XDR

**24*7 Security
Control**

Cyber Security

vSOCBox XDR

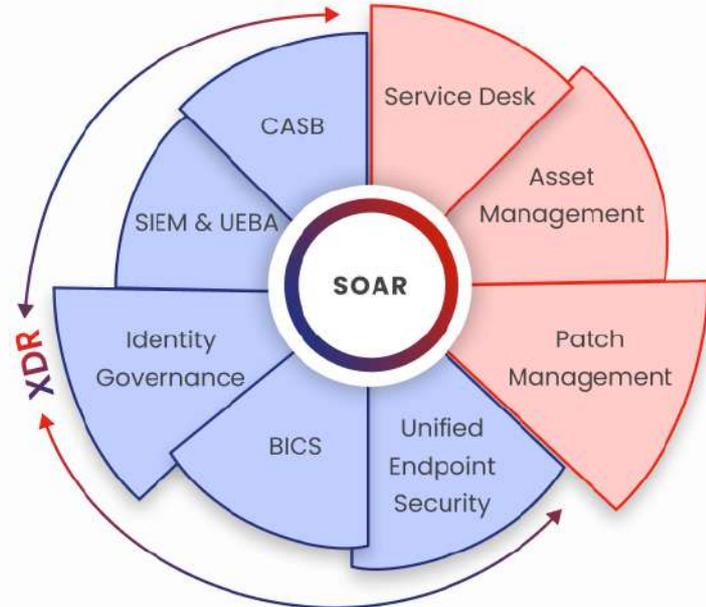

Next Gen Cybersecurity Shield
from Single Platform

Enhanced Cybersecurity with vSOCBox XDR

vSOCBox XDR is an integrated, centralized platform to detect, orchestrate & remediate cyber threats on-time with limited resources and fraction of cost.

vSOCBox XDR Modules

- Integrated XDR modules to detect threats & attacks from all layers
SIEM, CASB, BICS, EDR, VMDR, UEBA
- Correlates all different layer data sources
Extended detection mechanism
- Inbuilt AI based orchestration & automation
XDR based SOAR, patch management

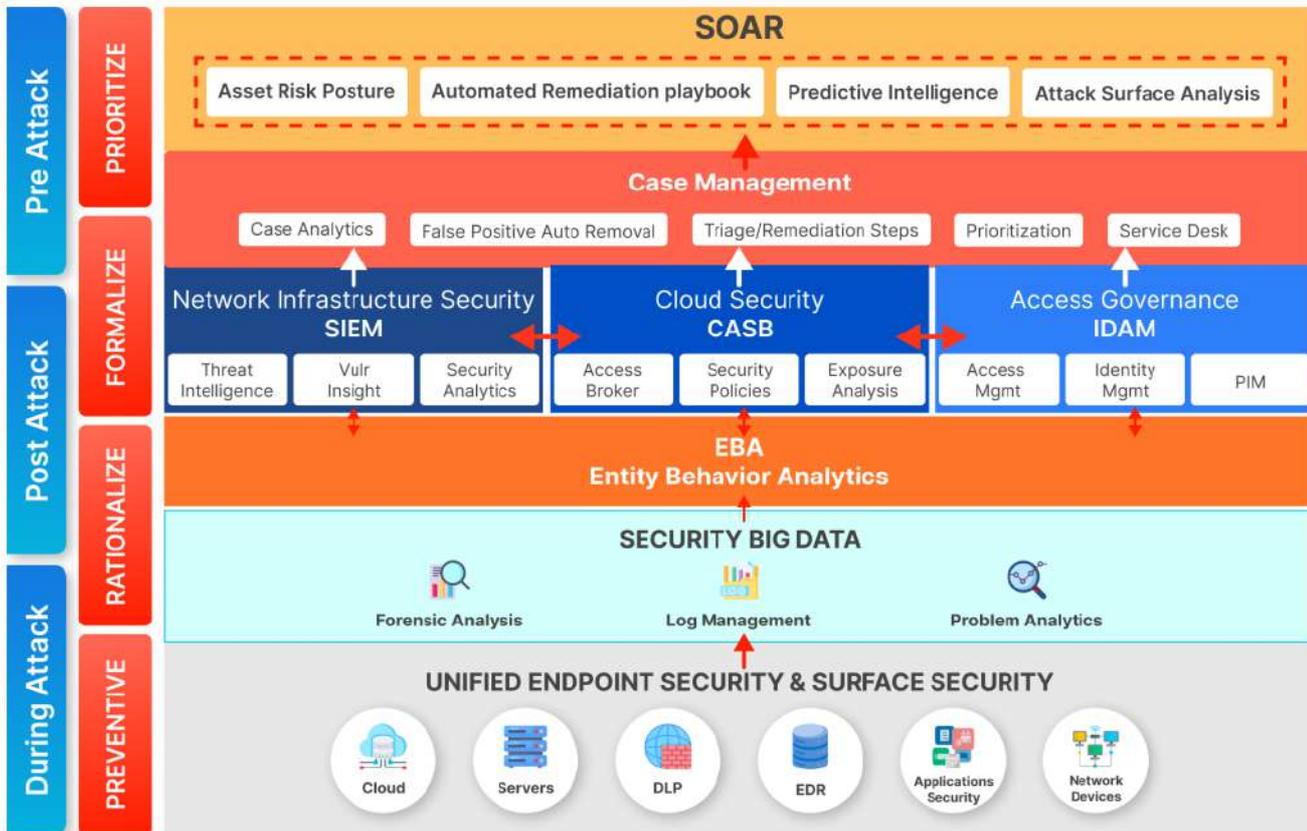

- Risk & compliance advisory view
Risk and compliance score view along with reports
- Advance threat & attack techniques detection engine
Ransomware, behaviour anomalies, zero day attack, lateral movements
- Deep alarm analytics for extended threats detection
In-depth security alarm analytics, surface attack analysis

vSOCBox XDR Features

vSOCBo XDR Platform Framework

vSOCBox, an AI/ML-based vSOCBox XDR modules framework, helps data be exchanged effectively as well as uniformly between various protection services and solutions.

vSOCBox XDR Capabilities

- Multi-tenant architecture
- A cloud-based data lake offers scalable storage, tiered data
- Detection rules- offer immediate risk score
- MITRE ATT&CK® framework integration
- Optimized data pipeline from all different layers
- Seamless system integration for enhanced functionality

Why vSOCBox XDR

- Multi solution in single stack
- Easy licensing and implementation model
- Start patching from zero day itself
- Cost effective with excellent SOC efficiency and safeguarding
- Provide visibility to risks and threats across all layers
- Improve SOC efficiency and effectiveness by 60%

About vSOCBox

- vSOCBox offers comprehensive cybersecurity portfolio
- vSOCBox has more than 15 years' experience in enterprise cyber security
- Our intelligence driven vSOCBox M-XDR platform has been recognised Globally

Who Trusted Us :

Global Presence

- Operational in 6 countries on all continents.
- More than 165+ Technical Support Engineer worldwide
