

vSOCBox

An all-in-one **SOC-in-a-Box** solution delivering comprehensive security, intelligent automation, and real-time threat detection.

About vSOCBox

vSOCBox is a unified, AI/ML-enabled cybersecurity platform — a complete SOC-in-a-box. It helps organizations detect, respond to, and manage cybersecurity threats with advanced automation and intelligent workflows.

AI/ML-Based Threat Intelligence

AI and machine learning power vSOCBox's ability to predict, detect, and prevent sophisticated threats.

Integrated XDR

With integrated XDR, vSOCBox detects, correlates, and responds to threats across all data sources in real time.

Compliance and Audit-Ready Licensing

Built-in compliance mappings (ISO, HIPAA, SEBI, Cert-In) ensure that license entitlements align with your audit needs.

Asset Discovery & Vulnerability Management

Continuously discovers assets and identifies vulnerabilities to reduce the attack surface.

The Cybersecurity Storm is Raging – **Are You Prepared?**

The digital landscape is a battlefield, and the stakes are higher than ever.
Your business faces a perfect storm of challenges:

Sophisticated Attacks

Ransomware, phishing, zero-day exploits – cybercriminals are constantly evolving their tactics, making traditional security measures obsolete.

Alert Overload

Disjointed tools bombard your team with false positives, leaving them exhausted and unable to focus on real threats.

Talent Shortage

Finding and retaining skilled cybersecurity professionals is a constant struggle, leaving your defences vulnerable.

Rising Costs

The financial impact of a cyberattack can be devastating, from lost revenue to regulatory fines and reputational damage.

Hybrid Complexity

Managing security across diverse cloud and on-premises environments is a logistical nightmare.

vSOCBox™: The Unified Platform That Simplifies CyberSecurity and Amplifies Results

AI-powered platform consolidates all the essential security functions into one powerful solution:

Dark Web Monitoring

Dark Web Monitoring helps detect if sensitive company data, such as credentials or confidential information, is being leaked or sold on the dark web, enabling timely alerts and proactive threat response.

App Security Management

Ensure uninterrupted discovery, analysis, categorization, mitigation, and monitoring to address vulnerabilities and prevent potential attacks and create a safe digital infrastructure.

SIEM & UEBA

AI\ML-Based SIEM Engines comprise four sub engines, including threat intelligence, VMD Engine, Correlation Engine, Deep Security Analytics and UEBA engine. .

EDR

With the help of in built policies, it captures the malicious activities in registry, files, network connections etc. and mitigate it in real time basis.

Log Management

This sophisticated solution establishes a centralized platform, orchestrating the efficient management of logs sourced from a diverse array of origins

Cloud Security

Ensure optimum protection to your assets with log management, log analysis and UBA without affecting the accessibility.

Cyber Insurance

Stay insured from any financial damage that may incur from data breach or cyberattacks.

Risk and Compliance

It helps an organization adhere to almost 21 security standards and regulations such as HIPAA, SOC2, ISO 27000, SEBI etc.

Performance and Availability Monitoring

Performance and Availability Monitoring ensures that systems are running optimally and remain accessible. It helps detect issues early, maintain uptime, and support quick response to disruptions.

Intelligent Automation

Smart automation of SOAR platform enables center stage to automate incident reporting and remedial actions.

Vulnerability manage detect and response

Smart automation of SOAR platform enables center stage to automate incident reporting and remedial actions.

vSOCBox™ Dashboard

Gain 360° Visibility & Control of Your Cybersecurity

AI-Powered 24X7 Cybersecurity Command Center

360° Visibility

Get a comprehensive view of your security posture, across all your digital assets, in real time.

Context-Aware Insights

Our AI engine correlates data from different sources to provide actionable insights and prioritize threats.

Customizable Views

Tailor the dashboard to your specific needs and focus on the metrics that matter most to your business.

Proactive Risk Management

Identify vulnerabilities and potential threats before they become incidents.

Real-Time Threat Detection

Spot anomalies and suspicious activity as they happen, enabling rapid response.

Compliance Monitoring

Track your adherence to industry regulations and standards effortlessly.

Unrivalled Protection, One Powerful Platform.

vSOCBox™ isn't just another security suite. It's a living, learning ecosystem that combines the power of AI with human expertise to deliver unparalleled protection.

vSOCBox vs Traditional Systems

Comparative Chart

Feature	vSOCBox	Traditional Solutions
All-in-One Modules	✓ In-built	✗ Disparate tools
Automation(L1/L2 + SOAR)	✓ AI/ML-driven	✗ Mostly manual
Log Analytics	✓ Full indexing & analysis	✗ Partial or limited
Compliance	✓ SEBI, RBI, ISO, HIPPA, etc.	✗ Often lacking
Threat Detection	✓ Proactive AI	✗ Signature-based only
Incident Resolution Time	✓ 10 mins–1 hr	✗ 2–5 hrs
Integration	✓ Easy API/Plugin-based	✗ Complex & limited
Support	✓ 24/7 Dedicated Managers	✗ 8/5 General Line

vSOCBox Partnership Program

Partnering with vSOCBox as a Value Added Reseller (VAR) opens up new growth opportunities for your business.

Business Growth

Unlock new revenue streams and boost profitability.

Joint Go-to-Market Strategy

Collaborative sales, training, and marketing efforts to drive success.

Strategic Support

Resources and alignment to help you deliver added value to your customers.

Grow Your Security Business as a vSOCBox Managed Security Service Provider (MSSP) Partner.

Flexible Licensing

Attractive margins and flexible licensing options.

Branding Options

White-label and co-branding options available.

Sales Support

Sales enablement, training, and marketing support provided.

Multi-Tenant Dashboards

Multi-tenant dashboards for MSSPs and MSPs.

Seamless Integration

Seamless integration, deployment, and automation capabilities.

Grow faster and deliver more with the vSOCBox Partnership Program for VARs and MSSPs.

Who is vSOCBox For?

Whether you're a growing startup, a compliance-heavy enterprise, or a Managed Security Service Provider (MSSP), vSOCBox has a story for you.

Enterprises (CIOs, CISOs)

Need seamless integration, robust compliance, and automated protection? We've got you covered.

MSSPs & MSPs

Want a white-label SOC you can deploy in days for multiple clients? That's our specialty.

Startups & SMBs

Looking for a simple, scalable solution that just works—without breaking the bank? We're built for you.

vSOCBox™

Top 5 Case Tpe Host

TYPE	ASSEST	CASES
Anomalies	192,168,533	1154
Apps & System Failures	214,152,35	1042
Corporate Net Attack	112,952,25	459
Expansion Virus	615,621,956	50
Vulnerability	356,124,296	14

Only vSOCBox™ Offers This Level of Integrated Protection.

SECURE YOUR BUSINESS FROM EVERY ANGLE.
